#### Various Implementations of Groundwater Irrigation: Challenges and Recommendations of Including it as a Forcing in CMIP7

Yi Yao, ETH Zurich, VUB

# Current dataset of groundwater for irrigation

**Percentage of groundwater irrigation** 

Area equipped for surface water irrigation

Siebert, S., Burke, J., Faures, J. M., Frenken, K., Hoogeveen, J., Döll, P., & Portmann, F. T. (2010). Groundwater use for irrigation-a global inventory. Hydrology and earth system sciences, 14(10), 1863-1880.

# Irrigation representations in ESMs

# Groundwater irrigation representations in E3SM

Leng, G., Huang, M., Tang, Q., & Leung, L. R. (2015). A modeling study of irrigation effects on global surface water and groundwater resources under a changing climate. Journal of Advances in Modeling Earth Systems, 7(3), 1285-1304.

### Groundwater irrigation representations in IPSL-CM6

Percentage of groundwater irrigation

Arboleda-Obando, P. F., Ducharne, A., Yin, Z., & Ciais, P. (2024). Validation of a new global irrigation scheme in the land surface model ORCHIDEE v2. 2. Geoscientific Model Development, 17(5), 2141-2164.

### Uncertainties in simulated water withdrawal

# Uncertainties in simulated TWS

ESMs: IPSL-CM6, CNRM-CM6, and CESM2\_gw

Challenge 1: various implementations of irrigation and groundwater withdrawal

Challenge 2: lack of projected information of groundwater irrigation

Challenge 1: various implementations of irrigation and groundwater withdrawal

Suggestion 1: using the land module of each ESM to calibrate the parameters to get similar water withdrawal.

Challenge 2: lack of projected information of groundwater irrigation

Suggestion 2: keep the parameters fixed using one land model considering water availability to project related parameters.

Hurtt, G. C., Chini, L., Sahajpal, R., Frolking, S., Bodirsky, B. L., Calvin, K., ... & Zhang, X. (2020). Harmonization of global land-use change and management for the period 850–2100 (LUH2) for CMIP6. Geoscientific Model Development Discussions, 2020, 1-65.

# THANKS!
