

Pathway to regular and sustained delivery of climate forcing datasets workshop: 28-31 October 2024, ECMWF Reading

Session 5: What are the MIP needs?

Chairs: Stephanie Fiedler

Agenda

Presentations

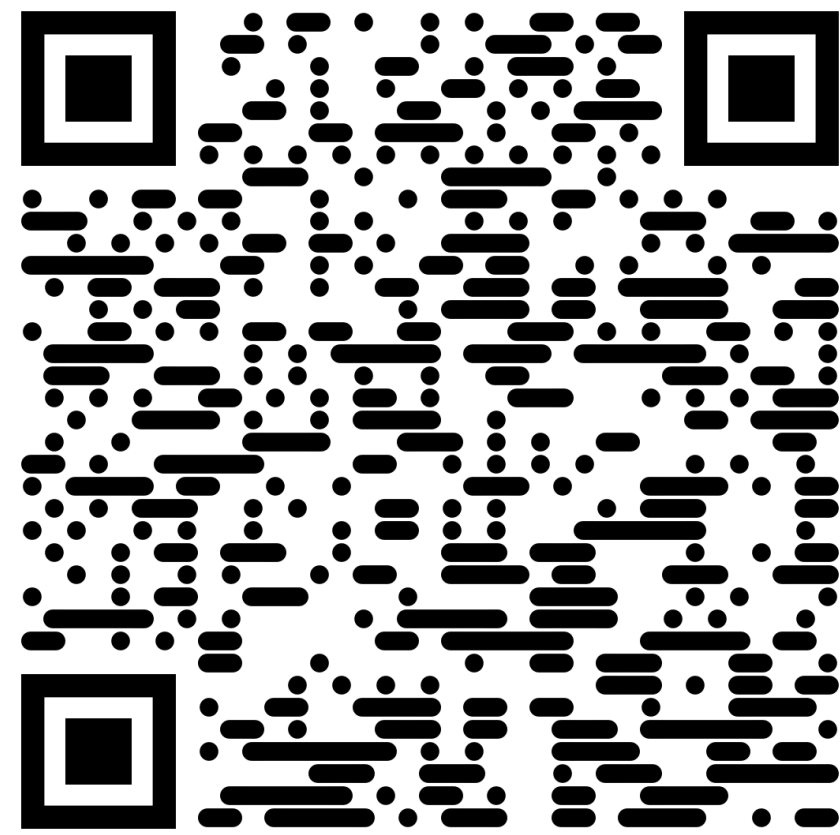

- Population density data (HYDE) - highlighting the need from the models' perspective (**Jane Mulcahy**)
- Hydrogen (**Maria Sand**)
- Dust emissions (**Stephanie Fiedler**)
- Land-only and ocean-only atmospheric forcing datasets (**Dave Lawrence**)

Discussion

- Needs for other contributed datasets (scenarios/idealized)
- Outcome: identify points of contact for forcing data delivery

Join the discussion and list your needs in the padlet
